This year, the Early Learning Summit will give you the opportunity to direct your own learning about the programs, practices, and data that are most likely to meet your current needs through a variety of sessions facilitated by your colleagues in early learning in the region. In the afternoon, you will have the opportunity to continue learning from others and to do some reflection and planning with your team for your own P-3 systems with the support of the [Framework for Planning, Implementing, and Evaluating P-3 Approaches](#) (Kauerz & Coffman, 2013).

**Northwest Educational
Service District 189**
